Forecast for Friday 19 Mar 2021

Weather: Low cloud will continue to shroud most ranges through the early hours of Friday. A dull, drizzly start but clearer skies towards Glen Affric with some patchy frost here. Poor visibility will be the main feature of the day but some improvement through afternoon is expected away from the west coast, with Easter Ross likely seeing some late sunshine.

Chance of cloud free mountain/hill tops above 800m: 60% for Glen Affric and, later the eastern ranges. Otherwise virtually no chance especially through morning.

Visibility: Extensive cloud above 200-400m gradually rising 500-700m. Rather hazy or misty below the main cloud base, especially near the west coast. Improving quite widely through afternoon.

Met Office Aberdeen Meteorologist's View

Best conditions expected towards the Great Glen. Glen temperatures closer to 2C initially under clearer skies in the south. Sunny breaks during afternoon will lead to some sun glare off the remaining snowfields on highest ground.

Forecast for Saturday 20 Mar 2021

Weather: Extensive cloud across most ranges, this persistent along the west coast with patchy drizzle. Some breaks across the more sheltered east, mainly through morning. A band of light rain (snow above 800m) will sink southwards through evening.

Maximum wind: West 15-20mph increasing 25-30 gusting up to 40mph from late morning.

Chance of cloud free mountain/hill tops above 800m: 40% across the east through morning, otherwise 10% at best.

Visibility: Cloud becoming extensive and persistent above 200-300m in west and 400-600m in east. Remaining rather hazy below the cloud in the west, especially as rain and drizzle set in later, but much improved in the east.

Temperature: **Glens:** 2-5C rising to 6-8C.
At 800m: 1 or 2C.
Freezing level: Above summits, falling to 800-100m from the north after dark.
